

FAMILY SUCCESSION PLANNING HELPING OUR FARMERS STAY STRONG FOR GENERATIONS - RABOBANK

We've achieved a lot in the last four years. To be able to be collectively working together and to be working with my sons as peers in business is an amazing place to be." Murray Douglas

The Journey of Succession

Working with your family in business and through the transition from one generation to the next can be challenging. We have a long history of working with rural families and our family business and succession planning specialists can help guide your family through the complex issues so you can reach a shared vision for your farm.

Every family farm is different so one solution does not fit all. Families which start their succession planning early, benefit from increased financial security for each generation, increased motivation for the next generation and greater family cooperation.

Our succession planning services offer a proactive approach to help your family business realise its potential and deal with change.
